

## MARK-3<sup>®</sup> 185cc Gudgeon Pin

### TECH-NOTE

#### Overview

A new gudgeon pin has recently been introduced on the MARK-3. The change became effective in March 2015. The new gudgeon pin is fully backwards compatible.

#### New gudgeon pin

The new gudgeon pin has a more modern design. Its inner diameter is tapered: the pin is thinner at the edges and becomes thicker towards the center where the forces and stresses are greater. The result is a new gudgeon pin that is 19% lighter than the previous design. The lighter weight helps increase the durability of the crankshaft and bearings. The item number (800030) remains unchanged.
