

BB-4[®]

HIGH-PRESSURE FIRE PUMPS

The **BB-4[®] high-pressure fire pump** has been used by forestry agencies to combat wildfires for over 40 years. It has been the weapon of choice in many wildland operations and is especially suited for type 6 brush trucks. The BB-4[®] pump generates the high pressure required to overcome challenges that arise in difficult terrain.

This unit is available in different configurations:

- Portable
- Vehicle-mounted
- Horizontal and vertical drive orientation
- Engine-mount control panel
- Fuel tank
- Exhaust primer

APPLICATIONS

- Direct attack wildfire operations.
- Slip-on units.
- Relay tank pumping for remote watering during firefighting operations.
- High-elevation firefighting in mountainous areas.
- In series pumping over long distances.
- Parallel pumping for higher volumes.

FEATURES AND BENEFITS

- Quick-release clamp and detachable pump end for ease of maintenance and minimal equipment downtime.
- Sealed bearing to eliminate pump end greasing in the field.
- Drive assembly for reliable, low maintenance performance.
- Aluminum alloy pump components and anodized parts for lighter weight and great resistance to corrosion.
- Multiple engine types available.
- Choice of manual, electric or exhaust priming.
- FastWire included on all vehicle-mounted units.
- Optional single control panel and dual control panel with remote throttle control.
- EPA certified.
