### DATA SHEET

## MID-RANGE 2-STAGE FIRE PUMP

Designed for OEM Fire Apparatus Manufacturers who need a vehicle mounted pump the **WATERAX B2X** is a versatile Mid-Range portable pump that delivers the best performance of its class with minimal operating costs. Unlike other pumps, the **B2X** uses a low maintenance drive belt system that provides efficient and dependable performance.

The **WATERAX B2X-25H** pump pairs a reliable mid-range performance 2-stage pump end with a powerful **24.8 HP Honda 4-stroke IGX800 EFI** engine to achieve pressures of up to **210 PSI (14.5 BAR)** and flow rates reaching **300 GPM (1136 L/Min)**. A strong show of both pressure and volume makes it the ideal pump for vehicle mounted applications dedicated to municipal and wildland urban interface operations. It is fully compatible with the **DCP**, supporting both **single** and **dual control panel configurations**. The engine speed can be controlled via the **DCP** directly through the engine **ECU**, without the need for an additional throttle actuator.

The **WATERAX** quick release clamp provided on the **B2X** pump provides ease of maintenance without having to disassemble the complete pump unit thus significantly reducing equipment downtime.
