WE MOVE WATER

VERSAX[®] **CART SYSTEM**

Mobile Fire Protection. Ready When It Matters.

A fully mobile, all-in-one fire-response solution designed for structure protection, property defense, and utility applications.

THE VERSAX® CART SYSTEM

Built around the proven **VERSAX® self-priming pump**, the VERSAX® Cart System delivers reliable water flow and pressure in a rugged, easy-to-deploy format. It can draft water directly from a backyard swimming pool or other static water source to support structure protection, direct firefighting action, and emergency water transfer.

Whether preparing for wildfire season, defending a home, or pumping water from a pool to the street so responders can refill firefighting apparatus, the VERSAX® Cart System provides dependable performance with minimal setup.

Built for Rapid Deployment and Ease of Use

The rugged trolley cart allows for easy transport, quick setup, and compact storage—making it practical for homeowners and property managers looking for a budget-friendly system that pumps water from a pool to help protect their home from wildfires.

Designed with the end user in mind, the VERSAX® Cart System features:

- **Integrated VERSAX® self-priming pump** delivering strong, consistent performance.
- **Self-priming capability** for fast drafting from pools, tanks, or natural water sources.
- **Electric start** for quick, user-friendly operation.
- **Organized onboard hose storage** to keep equipment accessible and ready.

With a pump and a sprinkler—or direct action using nozzles—property owners can actively wet down structures, vegetation, and defensible space when conditions escalate.

Multipurpose by Design

The VERSAX® Cart System is engineered for versatility across multiple applications:

- Sprinklers for structure protection and defensible space wetting.
- Direct action with nozzles for spot suppression and exposure protection.
- Pumping water from a pool (water source).
- Wildfire preparedness for homes and properties.
- Water transfer and tank filling.
- Utility and maintenance tasks.

Its durable construction and compact footprint make it well-suited for residential, agricultural, and light industrial environments.

Performance You Can Rely On

- Powered by a **Honda GX270 engine** for proven reliability and longevity.
- **EPA certified.**

Preparedness Starts with the Right Equipment

Having a fire-response system accessible and ready gives property owners the ability to prepare early, protect structures, and support emergency response efforts when conditions escalate.

The **VERSAX® Cart System** combines mobility, reliability, and performance into a single, easy-to-use solution — built on WATERAX's legacy of trusted water-handling equipment.

Use fire-prevention guidance from NFPA's Firewise® Communities, FireSmart Canada, and similar sources to prepare WUI homes and properties, and evacuate without delay when authorities issue an evacuation order.

PERFORMANCE

Without frame (mountable)

With frame (portable)

VS2-6 Honda GX200

The **VS2-6** is powered by a 6 HP Honda engine.

Flow rate at specified pressure

Maximum pressure: **120 PSI** (8.3 Bar)
 Free flow: **105 US gals/min** (397 L/min)
 Maximum head: **277'** (84 m)
 Weight: **56 lbs** (25 kg) - **116 lbs** (53 kg)

Performance

Flow		Pressure		
US GPM	L/min	@	PSI	Bar
83	314	@	50	3.4
63	238	@	75	5.2
38	144	@	100	6.9

VS2-9 Honda GX270

The **VS2-9** is powered by a 9 HP Honda engine.

Flow rate at specified pressure

Maximum pressure: **150 PSI** (10.3 Bar)
 Free flow: **105 US gals/min** (397 L/min)
 Maximum head: **347'** (106 m)
 Weight: **79 lbs** (36 kg) - **96 lbs** (43.5 kg)

Performance

Flow		Pressure		
US GPM	L/min	@	PSI	Bar
92	348	@	50	3.4
80	303	@	75	5.2
64	242	@	100	6.9

***Available with an electric start and battery.**

VERSAX® Cart Kit

The cart kit transforms a VERSAX® pump with a wrap-around frame into a cart system which provides superior water-transfer performance.

VERSAX® Cart System

The balance of flow and pressure makes the cart system ideal for sprinklers, hose lines, structure protection, and general water handling tasks.

VERSAX® Multipurpose Pump

ITEM NO	MODEL	DESCRIPTION
100076	VS2-6P	The VERSAX®-6P is powered by a 6 HP Honda engine in a portable configuration.
100093	VS2-6V	The VERSAX®-6V is powered by a 6 HP Honda engine configured for vehicle mounting.
100110	VS2-6W	The VERSAX®-6W is powered by a 6 HP Honda engine in a portable configuration with a wrap-around frame.
100077	VS2-9P	The VERSAX®-9P is powered by a 9 HP Honda engine in a portable configuration.
100078	VS2-9EV	The VERSAX®-9EV is powered by a 9 HP Honda engine configured for vehicle mounting, electric start and battery.
100111	VS2-9W	The VERSAX®-9W is powered by a 9 HP Honda engine configured to be portable with a wrap-around frame.
100112	VS2-9EW	The VERSAX®-9EW is powered by a 9 HP Honda engine in a portable configuration with a wrap-around frame and an electric start and battery.
600593	-	The CART KIT VERSAX® includes an extension frame, equipment pouch, wheels, and hardware.

MOQ: 8 Mix & Match / 8 per pallet

*Product and specifications are subject to change without notice.

PARTNER WITH WATERAX

Proven in wildfire response. Trusted for structure protection worldwide.

Sales engineering, specification documents, demos, and integration support available upon request.
