

The WATERAX **STRIKER DIESEL Watson Edition** combines a reliable YANMAR L100 diesel engine, producing 9.3 hp, with the innovative, lightweight and highly efficient **MARK-3® Watson Edition** 4-stage pump end to deliver exceptional performance. The unit achieves pressures of up to 310 PSI and flow rates reaching 112 US GPM.

Strong enough to operate as a source pump for tandem and parallel pumping, it is also optimal for direct attack firefighting, remote watering, sprinkler systems and is a popular choice for slip-on units.

The WATERAX quick release clamp provided on the pump lets you replace a damaged pump end in the field with minimal equipment downtime. The 4-stage pump end is identical to the pump end on the **MARK-3® Watson Edition** unit, which greatly reduces your spare parts inventory and improves your ability to respond to unforeseen equipment damage.

STRIKER DIESEL

HIGH PRESSURE 4-STAGE FIRE PUMP

APPLICATIONS

- Attack line firefighting
- Long hose lay for remote watering during firefighting operations
- High elevation firefighting in mountainous areas
- Accuracy in flow trajectory when structure fire fighting
- Tandem pumping over long distances
- Parallel pumping for higher volumes
- Slip-on units

FEATURES AND BENEFITS

- Quick release clamp and swappable pump ends for minimal equipment downtime and inventory
- Belt drive system for reliable, low maintenance performance
- Aluminum alloy volute and suction cover for light weight and greater resistance to corrosion
- Composite corrosion-resistant pump components
- Sealed bearing to eliminate pump end greasing in the field
- Low oil pressure switch included
- External mount fuel pump included
- Vibration dampeners included
- Optional single control panel and dual control panel with remote throttle control
- Application matched and approved by YANMAR
